

WORKSHOPS

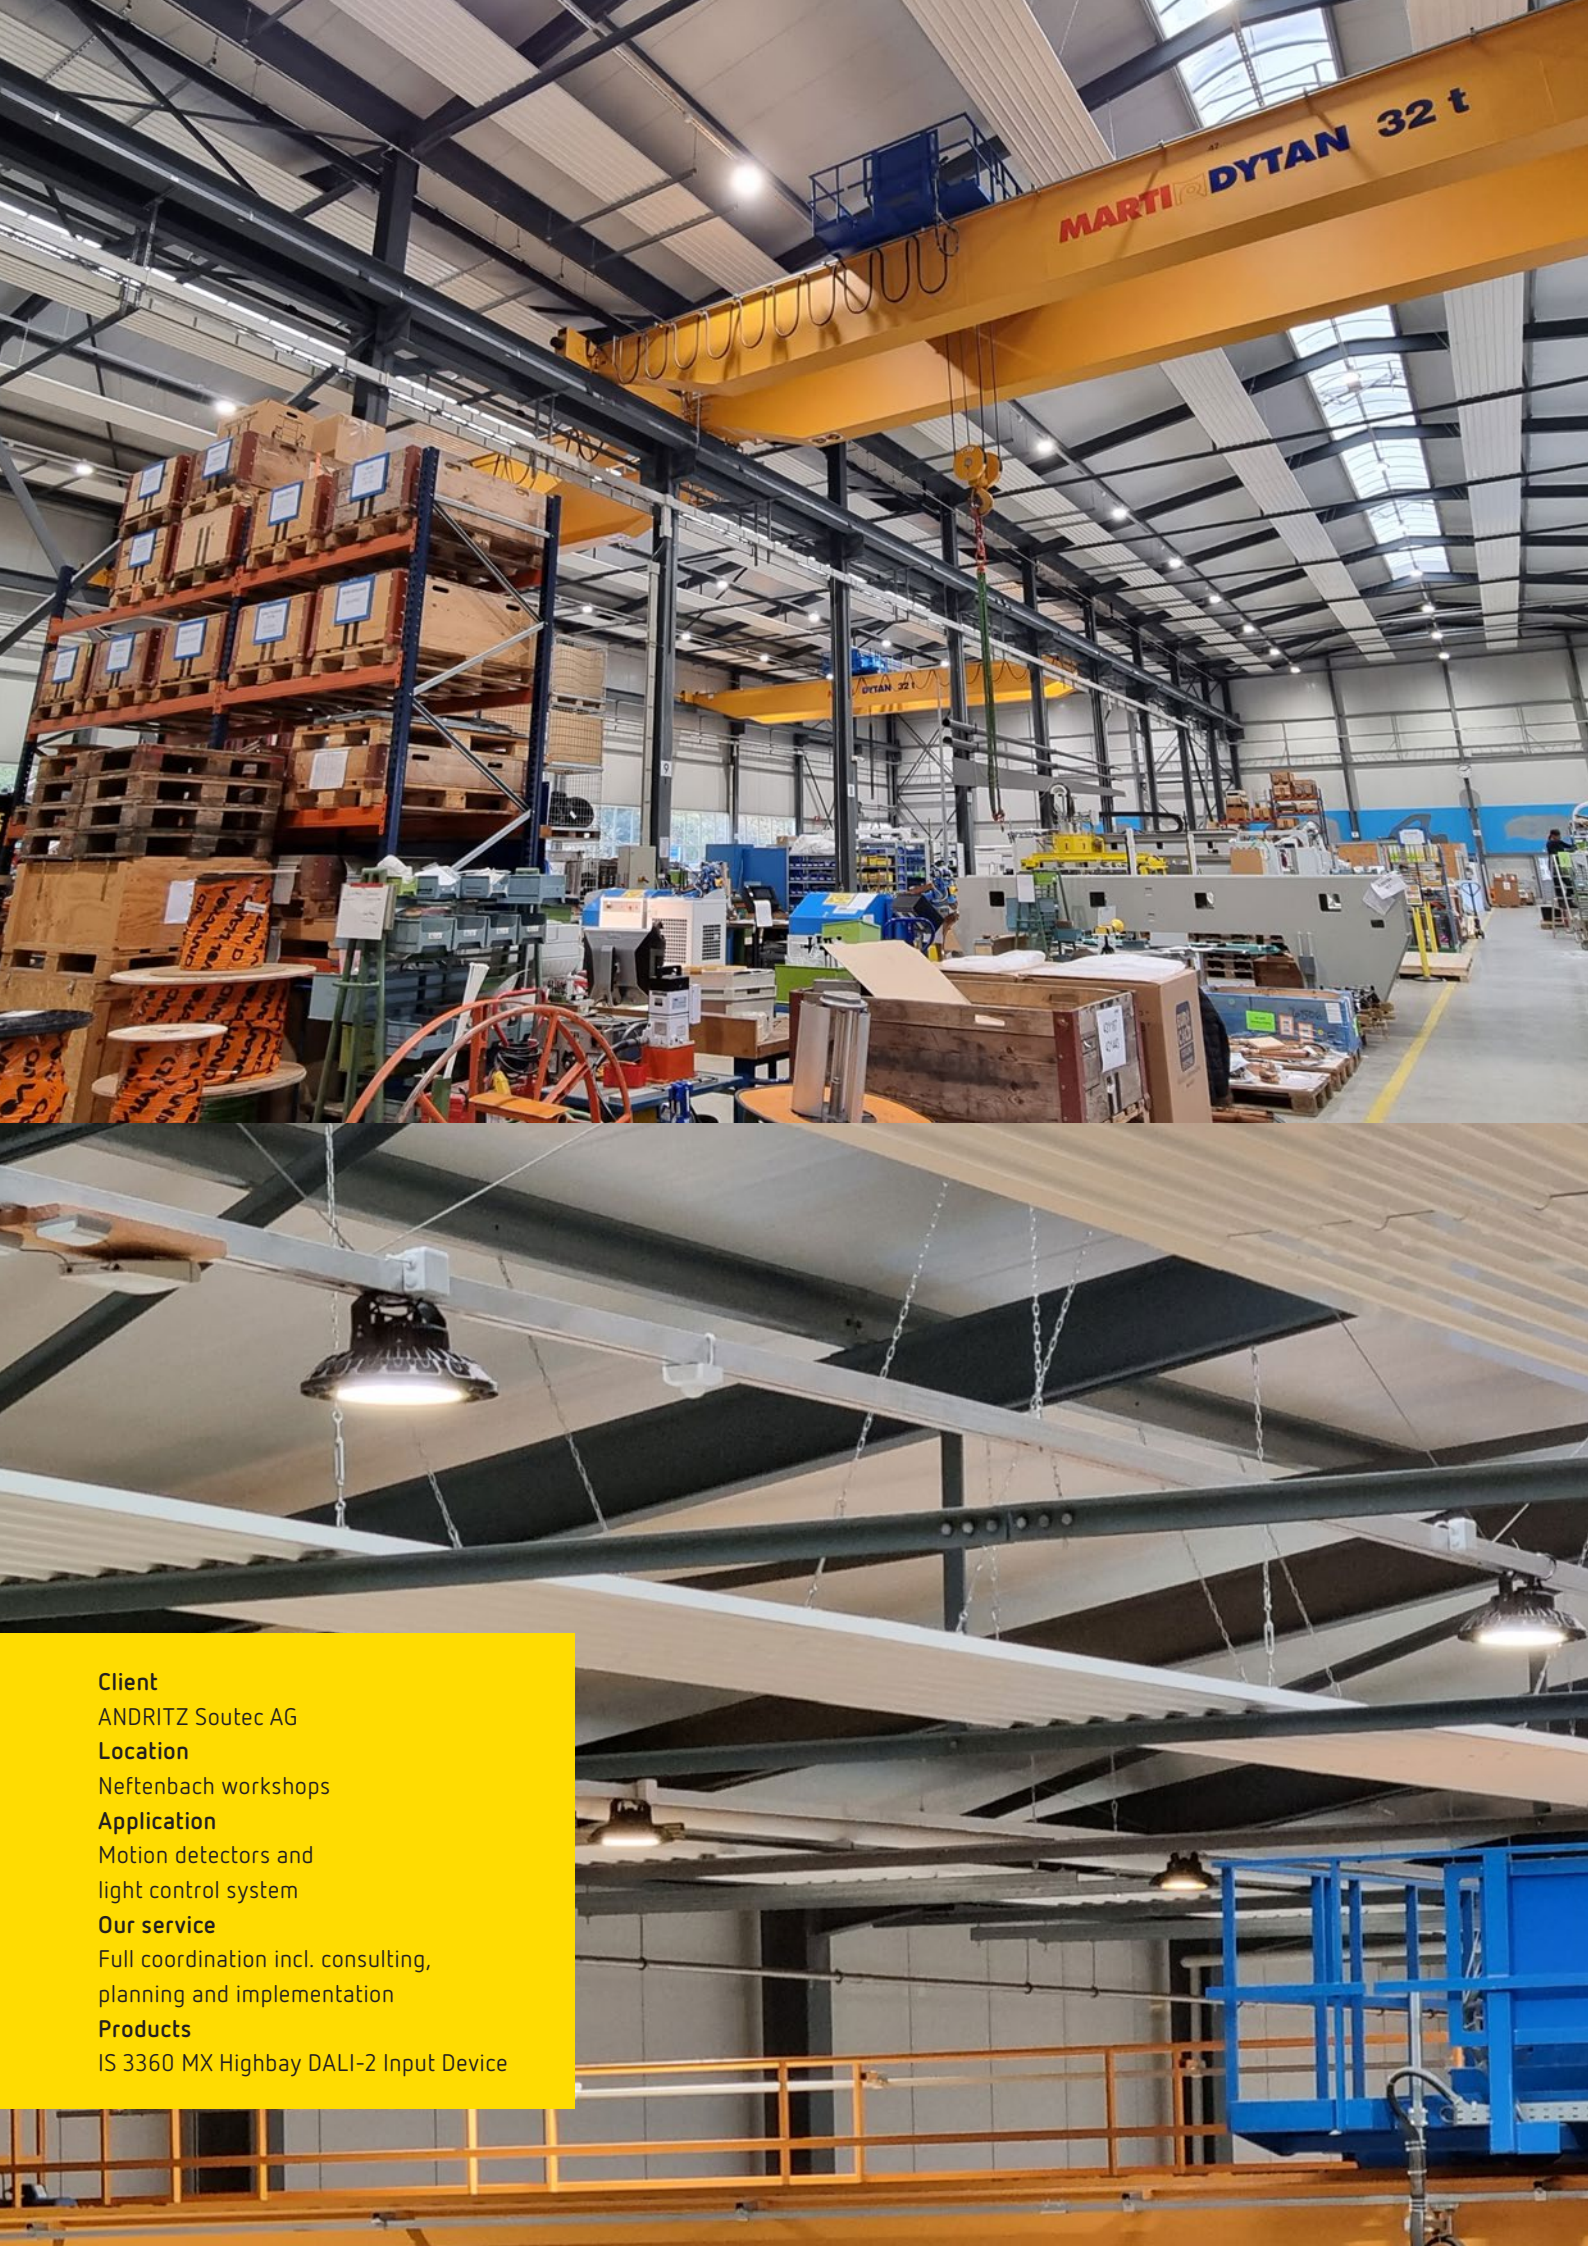

ANDRITZ SOUTEC AG

A-TO-Z PROJECT LEAD

neva
lux

nevalux.swiss

Client

ANDRITZ Soutec AG

Location

Neftenbach workshops

Application

Motion detectors and
light control system

Our service

Full coordination incl. consulting,
planning and implementation

Products

IS 3360 MX Highbay DALI-2 Input Device

Plan a lighting renovation with us and you need not worry about implementation.

Two huge production halls, 11 metres high – and poorly lit. The outdated sodium vapour spot lighting was well past its prime.

We presented ANDRITZ Soutec AG with a complete package. Alongside modern, energy-efficient spotlights, presence detectors with brightness sensors and a lighting control system for constant light control, we also took care of everything “around it”. Proper disposal of the luminaire housings and lamps, weighing tonnes? No problem. A lifting platform for the installation? Organised. The application for subsidies? Already done!

We listen and ask questions. Until we have the perfect solution.

After a thorough analysis, ANDRITZ Soutec AG received a comprehensive document with every detail of the proposed lighting solution. We don't simply hand this dossier to the client. We go through it point by point, answer open questions and respond to suggestions and objections. This process builds a foundation of trust. Our clients should know: when we take responsibility for implementation, the project succeeds from A to Z.

“nevalux AG won us over right from the evaluation phase. The graphs on electricity savings, the use of existing installations, the right products and the proper disposal of the old luminaires – they thought of every detail.”

Rolf Furter, Head of Purchasing, ANDRITZ Soutec AG

Reaching new heights: Highbay products by STEINEL

- 360° detection area, 40 m in diameter
- Area can be limited with masking shutters
- Special versions for heights of up to 14 m
- Presence detector switch-off logic
- Bidirectional control with Smart Remote
- 7 versions for flexible use

Light is our passion, forward-looking lighting solutions our mission. To make the world a little brighter. Inspiring people with intelligent lighting solutions. Solutions that deliver energy efficiency, safety and comfort. That is our mission.

LIGHTING CONCEPTS

As solution designers, we support you personally and assess the situation on site. The best basis for a perfect lighting solution.

PROJECT MANAGEMENT

It all starts with analysis. After solution-specific planning, we manage the implementation of the entire project and coordinate the trades involved.

INNOVATION

As pioneers and lateral thinkers, we keep developing our products and processes and get the most out of existing technology.
