Consulting, lighting solution,
project implementation,
client training

Products

RS PRO 5100 LED

The best companion in an underground car park: intelligent light and a sense of safety.

Underground car parks don't have the best reputation. Too dark, people often say. It doesn't have to be that way. The two underground car parks at the HGW Sennhof estate were upgraded with intelligent luminaires that communicate with each other. As soon as a car enters the detection area of the first luminaire, the main light switches on and the signal is passed on to the neighbouring luminaires. Users feel much safer, and the planning and installation effort was extremely low.

Extra comfort and safety are always welcome

With the right light in the right place at the right time, our lighting solutions contribute to people's well-being. In the underground car park, residents are accompanied by pleasant light every step of the way. Constant lamp replacement is a thing of the past. LED luminaires last ten times longer than a fluorescent tube (FL) and are many times more energy-efficient.

"Thanks to the nevalux lighting solution, tenants feel far safer, and energy costs have fallen significantly."

Sereina Keller, Team Leader Property Management, Heimstätten-Genossenschaft HGW, Winterthur

Guaranteed safe journeys with the RS PRO Connect 5100 LED Sensor.

- Extremely energy-efficient
- Complete flexibility in grouping
- Very easy installation
- Invisible HF motion detector
- Adjustable range Ø10m
- Configuration and networking via Bluetooth
- Adjustable brightness for main and base light
- Light leads the way thanks to neighbour function
- Movable brackets for existing drill holes

Light is our passion, forward-looking lighting solutions our mission. To make the world a little brighter. Inspiring people with intelligent lighting solutions. Solutions that deliver energy efficiency, safety and comfort. That is our mission.

LIGHTING CONCEPTS

As solution designers, we support you personally and assess the situation on site. The best basis for a perfect lighting solution.

PROJECT MANAGEMENT

It all starts with analysis. After solution-specific planning, we manage the implementation of the entire project and coordinate the trades involved.

INNOVATION

As pioneers and lateral thinkers, we keep developing our products and processes and get the most out of existing technology.
